

Ruby Project | Shop Inventory

Admin/Management App for Tracking Products

GOALS

- Understanding of Ruby Classes
 - Test Driven Development (TDD)
- Understanding of Databases
- RESTful Routes and Sinatra

FURTHER EXTENSIONS

- Sorting table by name of products, manufacturers, categories, quantities...
- Add Customer class:
 - Create customers
 - Customers can purchase
 - List purchases per customers
 - Most Popular Products
 - Show promotions or products in sale
- Pie Charts & Categories

THANK YOU
